

On-Demand Communication

Simple. Quick. Efficient.

cNotify is a dynamic notification tool that allows businesses, organizations, and agencies to send customized notifications and alerts to their employees and/or the public.

In just minutes, you can send secure, real-time communications to a defined group of individuals, regardless of their location via phone, email or text message.

As a hosted solution, cNotify requires no extra software or hardware. In event of an emergency, your phone infrastructure will not be overwhelmed due to high call volume, inbound or outbound.

Voice-Over-Internet Technology

cNotify uses VoIP technology to ensure that your messages reach each of your recipients in a matter of minutes or even seconds. The minimal time it takes to deliver the communications sets us apart from our competitors. In the event of an emergency, you can be confident that your message will be delivered quickly, without putting pressure on your communications infrastructure.

Notifications & Alerts

cNotify can be customized to broadcast numerous alerts and notifications including:

- Bad weather watches & warnings
- Emergency communications
- Closings, delays & rescheduling
- Appointment reminders
- Marketing to existing customers
- Time-sensitive notifications
- Collection notices

Industries

- Create groups for entire company, department, or location
- Send customized automated messages for reminders, absentee calls, or weekly work schedules

What Our Customers Are Saying About Us

“

CBTS' cNotify messaging service provides the Department of Catholic Schools with an effective and affordable means of communication with the parents and students. Our ability to quickly disseminate information about school closings or other unforeseen occurrences at school has proved invaluable.

Ray Hildebrand
Assistant Superintendent
Department of Catholic Schools
Diocese of Covington
